QMC-302 Field A: Incorrect length indicators when pushing "up" button										
QMC-303 Field C: Incorrect length indicators when pushing "down" button										
QMC-304 Field C: Highlights red when valid data is entered Medium SQL запити										
В компанії буде відбуватися підвищення заробітної плати. Директор хоче отримати список всіх девелоперів, їх повну інформацію, які пропрацювали більше одного року, та їх зарплату з урахуванням що вона буде збіль	ьшена на 15%.									
Спочатку створимо таблицю Employees:										
CREATE TABLE employees (ID INT PRIMARY KEY, name VARCHAR(50), position VARCHAR(50), salary INT, experience INT); INSERT INTO employees (ID, name, position, salary, experience) VALUES (1, 'Test', 'Qa', 1000, 7), (2, 'Qwerty', 'developer', 2000, 2), (3, 'Teqw', 'manager', 1500, 4);										
Тепер зробимо виборку з завдання:										
SELECT										
ID,										
name,										
position,										

salary * 1	15 AS new_salary						
experience	10 1.0 New_Surary	,					
FROM							
employees							
WHERE							
position =	'developer' AND						
experience	> 1;						
Створюємо та	облиці Users and Ca	rds					
Створтосько те	iomini oberbuna et	140					
CREATE TABLE ID INT PI Name VAR(RIMARY KEY,						
Age INT, cardId IN); INSERT INTO [(1, 'Mikola', (2, 'Andrii', (3, 'Oksana', (4, 'Oksa	Users (ID, Name, 1, 18, 1), , 49, 2), , 53, 3),	Age, cardId) VALUES					
);	RIMARY KEY, VARCHAR(20) Cards (ID, cardTy)	oe) VALUES					
Вивести ім'я та	а тип карти користув	ачів у яких вік від 25 до 60.					
SELECT							
u.Name,							
c.cardType							
FROM							
users u							
JOIN							
	.cardId = c.ID						
WHERE	.cardid = C.iD						
	. 05 50						
u.Age BETWEED	N 25 AND 60;
